TASK 1 COMPLETION REPORT

Deploy a Static Website on AWS S3

Submitted By	Saniya Shaikh
AWS Account	785446018888
Region	US East-1 (N. Virginia)
Bucket Name	aliza-s3-bucket
Live URL	aliza-s3-bucket.s3-website-us-east-1.amazonaws.com
Date	April 2026
Status	☒ COMPLETED

Step 1. Bucket Creation

An S3 bucket named aliza-s3-bucket was created in the US East-1 (N. Virginia) region. Block Public Access was disabled to allow public website hosting, and the bucket was successfully provisioned as shown below.

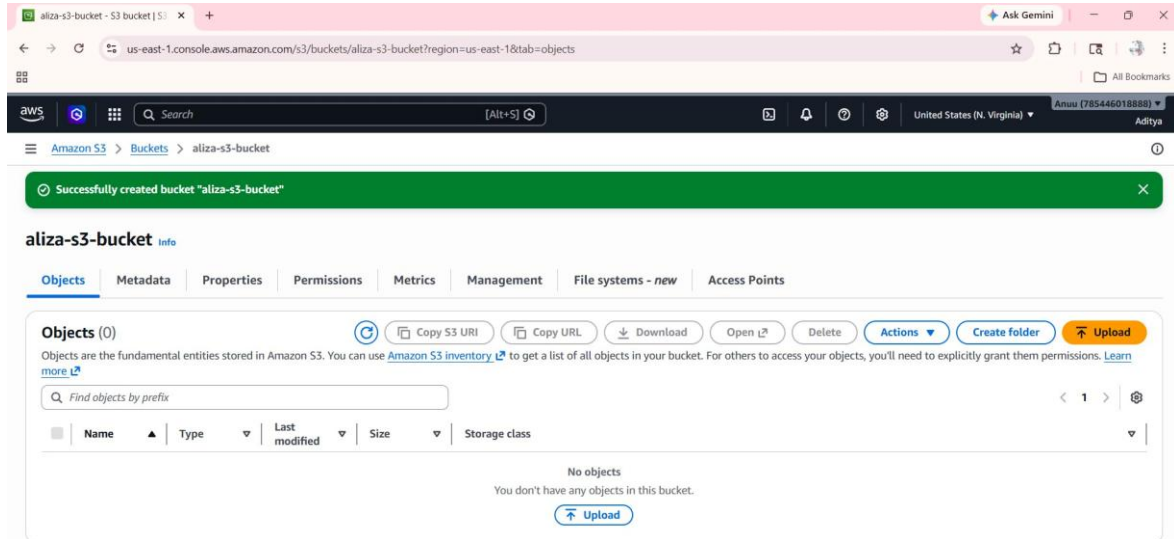

Figure 1 – S3 bucket 'aliza-s3-bucket' successfully created (Objects tab showing empty bucket)

Step 2. Enable Static Website Hosting

Static website hosting was enabled under Properties → Static Website Hosting. The hosting type was set to 'Host a static website' and the index document was configured as index.html.

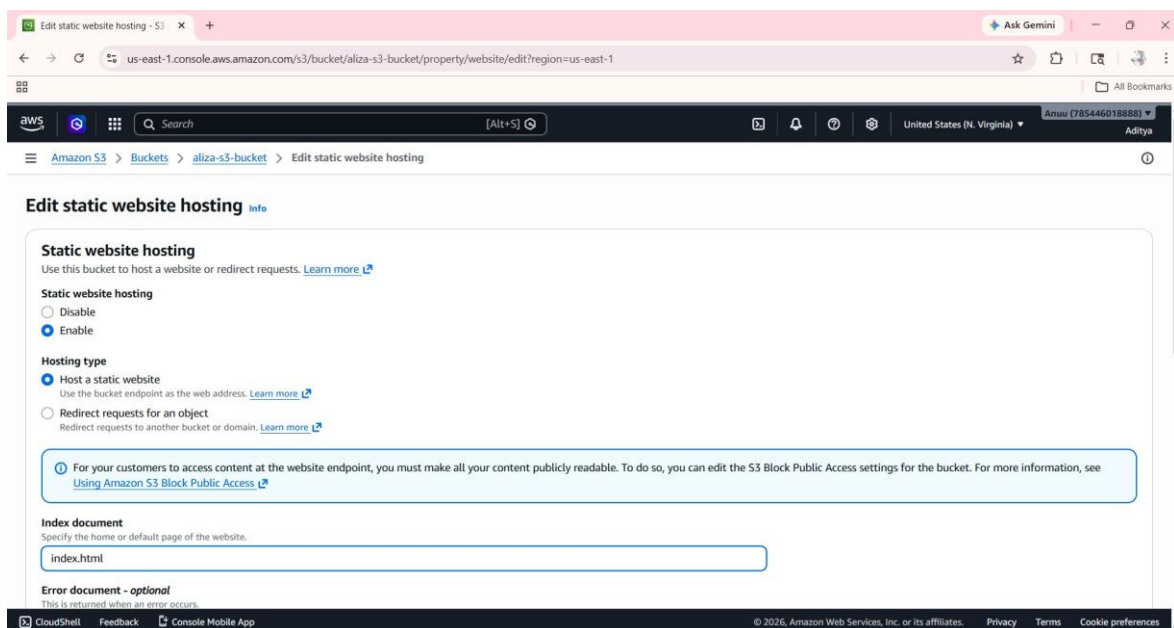

Figure 2 – Static website hosting enabled with index.html set as the index document

Step 3. Upload HTML/CSS/JS Files

The website file (index.html, 16.8 KB) was uploaded to the bucket. The upload completed with 100% success and zero failures, as confirmed by the S3 console summary.

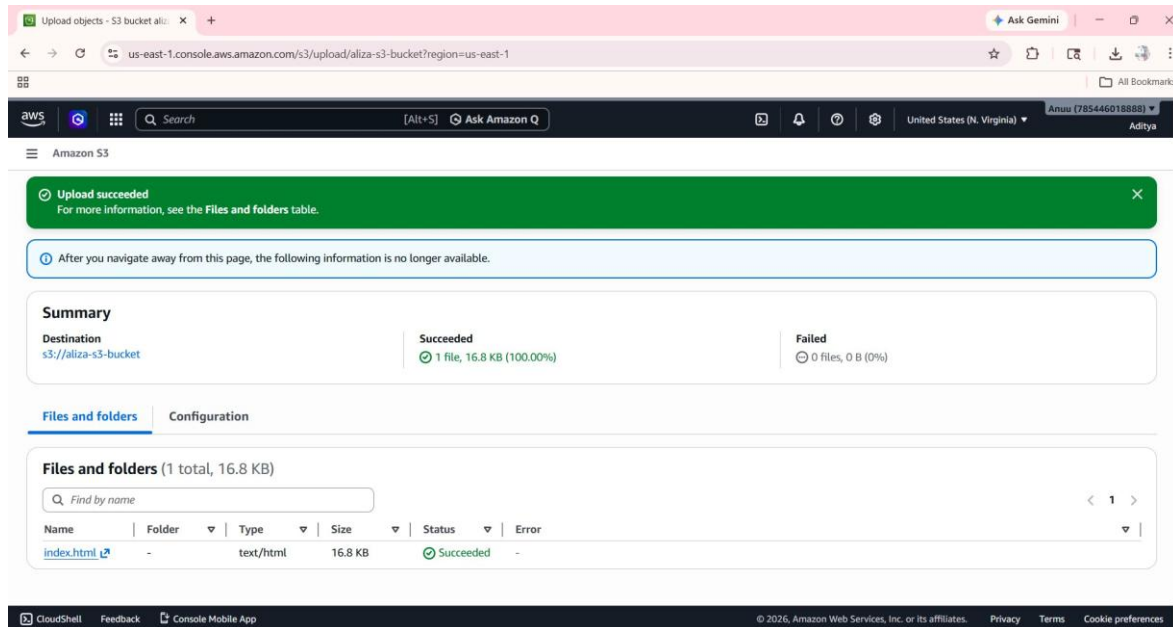

Figure 3 – File upload summary: index.html (16.8 KB) uploaded successfully to s3://aliza-s3-bucket

Step 4. Configure Bucket Policy – Public Read Access

A bucket policy granting public read access (s3:GetObject) to all principals (*) was applied. The JSON policy in the policy editor below.

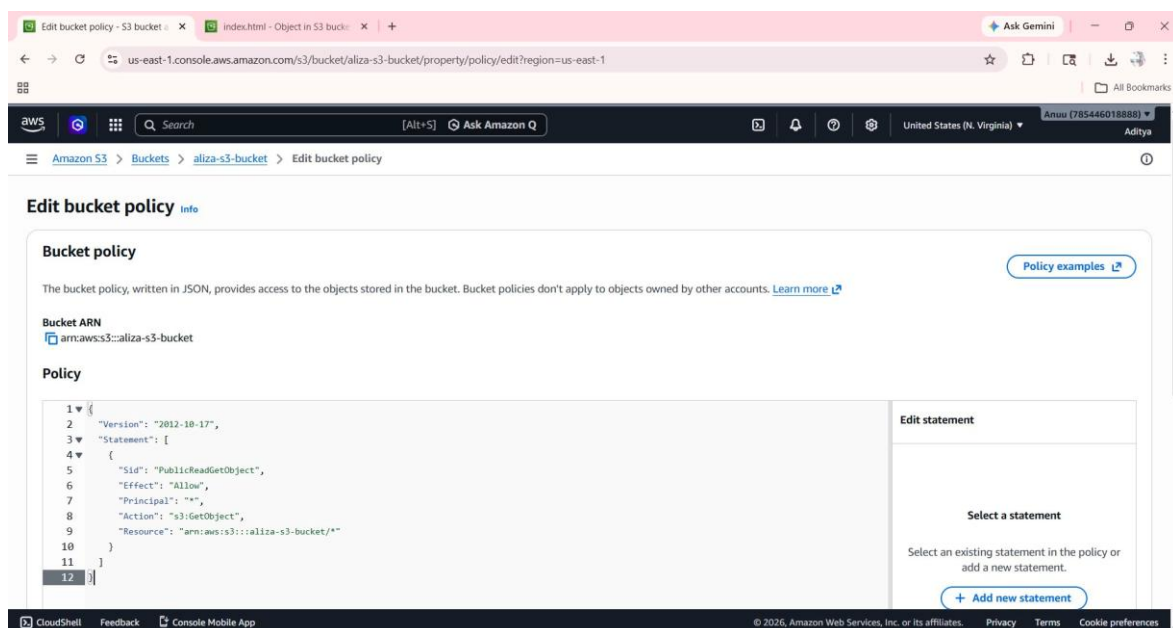

Figure 4 – Editing the bucket policy with PublicReadGetObject statement in the policy editor

Step 5. Bucket Policy – Successfully Applied

The bucket policy was saved successfully. The green banner confirms 'Successfully edited bucket policy.' The applied JSON policy is visible, granting GetObject access to the entire bucket (arn:aws:s3:::aliza-s3-bucket/*).

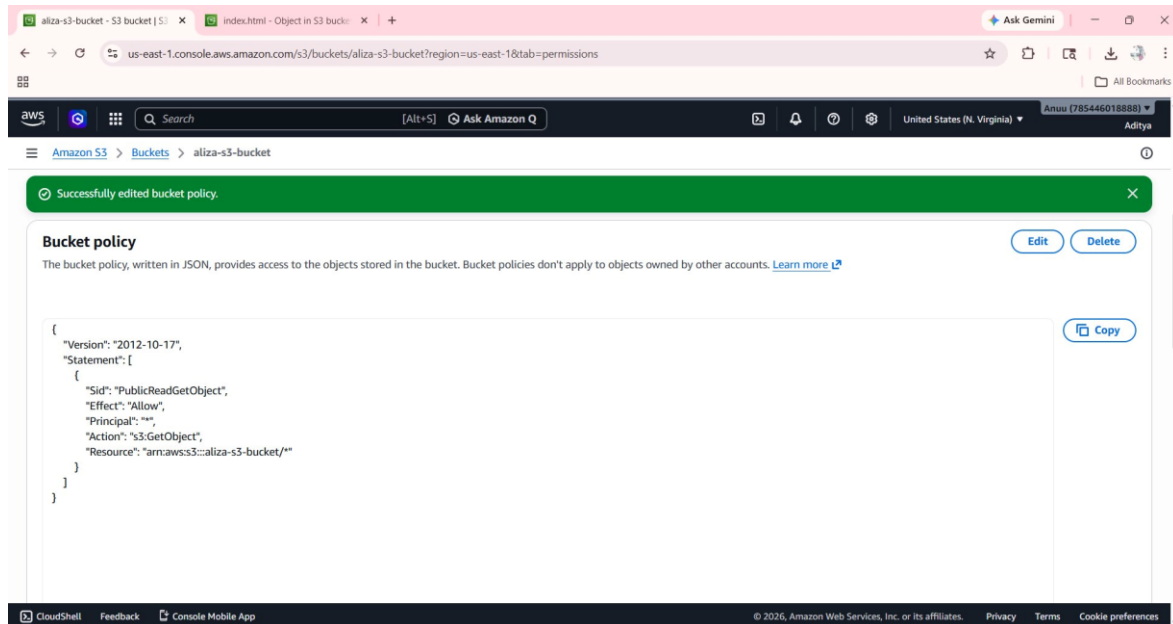

Figure 5 – Bucket policy saved: public read policy applied to aliza-s3-bucket

Step 6. Live Website Accessible via Public URL

The FOLIO Fine Books static website is publicly accessible through the S3 website endpoint. The browser confirms the site loads correctly at the public URL, displaying the full homepage with navigation, hero section, and book illustrations.

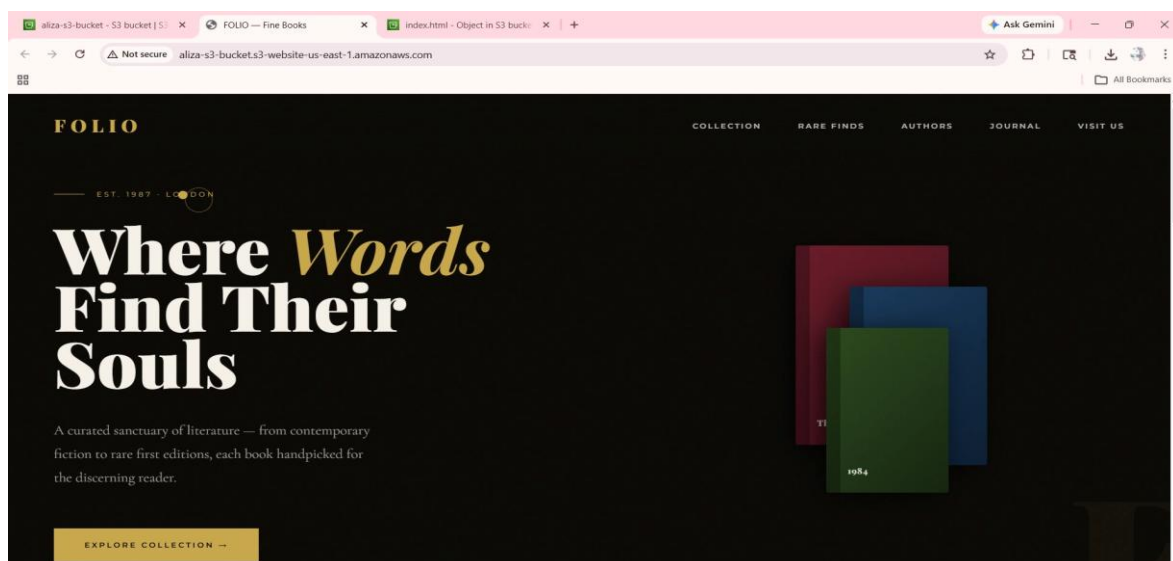

Figure 6 – Live website: FOLIO Fine Books running at aliza-s3-bucket.s3-website-us-east-1.amazonaws.com

Task Completion Summary

Requirement	Action Taken	Status
Create S3 Bucket	Created 'aliza-s3-bucket' in US East-1	✓ Done
Enable Static Hosting	Enabled with index.html as index document	✓ Done
Upload HTML/CSS/JS files	Uploaded index.html (16.8 KB) successfully	✓ Done
Set Public Permissions	Applied PublicReadGetObject bucket policy	✓ Done
Access via Public URL	Website live at S3 website endpoint URL	✓ Done

Deliverables

1. Live Website Link:

<http://aliza-s3-bucket.s3-website-us-east-1.amazonaws.com>

2. Screenshots of Bucket Configuration:

- Bucket creation confirmation
- Static website hosting enabled
- File upload success
- Bucket policy (editor view)
- Bucket policy (saved confirmation)
- Live website in browser
